Data, Models, and Decisions: The Fundamentals Of ...

This course is designed to introduce first-year Sloan MBA students to the fundamental techniques of using data. In particular, the course focuses on various ways of modeling, or thinking structurally about decision problems in order to make informed management decisions.

Data, Models, and Decisions | Sloan School of Management ...

Data, Models, and Decisions: The Fundamentals of Management Science. This book represents a departure from existing textbooks. Rather than covering methodology, the book introduces decision support systems through real world applications, and uses spreadsheets to model and solve problems. It uses management science techniques (statistics, simulation,...

Data, Models, and Decisions: The Fundamentals of ...

It uses management science techniques (statistics, simulation, probabilistic modeling and optimization), but only as tools to facilitate problem solving. The book is used in the core MBA program at MIT's Sloan School of Management for the class titled Data, Models, and Decisions.

Data, Models, and Decisions – Dynamic Ideas

Phase 2: Data, Models, and Decisions Page 26 of 40 Appendix: Supplementary Research Data is the New Currency – A Global and Local View Big Data Analytics or Big Data presents a new way to make money – and lots of it – by mining the huge amounts of data a company inevitably produces to foster more effective data-driven decision making.

Data, Models, and Decisions - academia.edu

Many managerial decisions—regardless of their functional orientation—are increasingly based on analysis using quantitative models from the discipline of management science. Management science tools, techniques and concepts (e.g., data, models, and software programs) have dramatically changed the way businesses operate in manufacturing, service operations, marketing, transportation, and finance.

Syllabus | Data, Models, and Decisions | Sloan School of ...

Data, Models and Decisions Master of International Business Fall 2017 Syllabus 1. Objectives The first objective is to introduce modeling and optimization as they apply to support practical decisions relevant to business management, marketing, operations management, supply chain management and etc.

Data, Models and Decisions - SJTU

Data modeling is a natural consequence of the prevalence of management information systems (MIS) in the real world. Together they form what in our days has become known as a Data Analytics system that provides management tools to evaluate performance and make decisions.

Data, Models, and Decisions: The Fundamentals of ...

Data Models and Decisions introduces participants to analytical techniques that establish the optimality of managerial decisions via empirical (“data models”) and logical (“decision modeling”)

means. The course may be viewed as consisting of two integrated parts.
