this book. In case of CSTR, however, some molecules will spend a short time and some will spend a long time in the reactor, although the residence time is the same as that of PFR. To allow the molecules spending shorter times in the reactor, to spend a longer time, the reactor volume has to increase.

Discipline. Chemical reaction engineering aims at studying and optimizing chemical reactions in order to define the best reactor design. Hence, the interactions of flow phenomena, mass transfer, heat transfer, and reaction kinetics are of prime importance in order to relate reactor performance to feed composition and operating conditions.
