

Sample Nursing Documentation For Patient

Documentation is such an essential part of nursing. To many it seems a waste of time. They'd rather spend their time with the patients, but in the interest of continuity, we have to be able to communicate information about the patient and the care we have given.

The terms medical record, health record, and medical chart are used somewhat interchangeably to describe the systematic documentation of a single patient's medical history and care across time within one particular health care provider's jurisdiction. The medical record includes a variety of types of "notes" entered over time by health care professionals, recording observations and ...

Medical record - Wikipedia

Patient participation is an important basis for nursing care and medical treatment and is a legal right in many Western countries. Studies have established that patients consider participation to be both obvious and important, but there are also findings showing the opposite and patients often prefer a passive recipient role. Knowledge of what may influence patients' participation is thus of ...

Nursing is the largest medical profession in the world with nearly 4 million nurses in the United States alone. As such, nurses have the potential to profoundly influence policy and politics on a global scale. In fact, it is the moral and professional obligation of nurses to be engaged in legislation that impacts their patients.

The nursing profession's potential impact on policy and ...

Many organizations now have clinical documentation improvement programs (CDIs) designed to help an organization accurately reflect the quality of patient care, illustrate healthcare services, and make precise reports of diagnosis and procedures. A clinical documentation specialist (CDS) can play a key role in the success of these programs, yet many nurses are unfamiliar with this [...]
