Triumph 1300 Engine

The Triumph 1300 is a medium/small 4-door saloon car that was made between 1965 and 1970 by Standard Triumph in Coventry, England, under the control of Leyland Motors. It was introduced at the London Motor Show in October 1965 and intended as a replacement for the popular Triumph Herald. Its body was designed by Michelotti in a style similar to the larger Triumph 2000.

triumph spitfire 1300 engine | eBay

For sale is one Triumph Spitfire MKIV 1300cc complete engine, it was taken out of a 1972 Triumph Spitfire. What you see in the pictures is what you get. The car had 67k miles. The number stamped on th...

Triumph Spitfire Engine | eBay

Slightly off topic, triumph 1300 engine OK, one of my other cars is a 1972 Spitfire 1300cc. Got the head reconditioned about 3 years ago. She is now burning oil and getting a bit emulsified. Compression is down by 40 psi on all 4 cylinders (pretty much the same on all four which I think is a bit odd) .

Slightly off topic, triumph 1300 engine - LocostBuilders

The 1500 engines were put in Spridgets for the same reasons they were put in later Spitfires. To give back some of the power the 1300 engines were losing to smog controls. 1275 MG engines were great engines and maybe slightly sturdier than the Triumph engines, but they weren't little screaming engines.

1500 or 1300 which is best : Spitfire & GT6 Forum ...

I spoke to the Triumph Tune Spitfire guru TERRY HURRELL, who personally owns a 120 Bhp 1500 as a daily driver. He put it simply and clearly: "If you want to win races with a screamer engine go for the 1300, if you want a good Torquey road car get a 1500". His 120 Bhp 1500 has so far completed 60,000 miles in a manner probably not approved of by ...

Which Engine to use - Teglerizer

This version was fitted to the new Triumph Herald 13/60 and Triumph 1300 saloons. When it debuted in the Triumph 1300 with a single Stromberg CD150 carburettor it developed 61 hp (45.5 kW). In the 1967 Mk3 Spitfire the engine in SU twin-carburettor form put out a claimed 75 bhp (55.9 kW) at 6,000 rpm, and 75 lb·ft (101.7 N·m) of torque at ...

engines supplied as warranty spares. Racing Engine Numbers: "70X" is the "Works" (Factory) 1147cc with eight-port head, "79X" is the 1296cc version. The 70 and 79 refer to the displacement of the engines in cubic inches.

Triumph Spitfire and GT6 Engine Numbers

Triumph's 1300 was a brave venture. It lacked the character and DiY-friendliness of the Herald, but the company's first front-wheel-drive model - and first small monocoque - was well engineered, with semi-trailing arm rear suspension and a comfortable, quality feel that received rave reviews ...
